### **Terms for international/ overseas purchases.**

**WE DO NOT ACCEPT CREDIT CARDS FOR PAYMENT OF ANY INVOICE.**

International/ Overseas sales are in US funds.

On all orders from international customers, a prepayment by bank wire transfer is required before shipping. The cost of the wire transfer is to be paid by the customer. If your bank deducts the cost of the wire transfer from the funds sent to us to pay for your order, we will have to send you another invoice to cover the short fall in your payment. This will delay the shipment of your order.

We also accept payments through Paypal – but we will have to add the Paypal charge of 3.5% to your invoice total.

All shipping costs and customs/ duties when the goods enter your country are the responsibility of the customer. It is usually more efficient if the international customer has an account with a shipping company that can smooth the shipment through their customs.

International shipments to customers using UPS – FedEx and DHL are collect on the international customer's account.

We will do all necessary paperwork on our end for customs.

We have a nominal charge of \$30.00 USD for international paperwork.

It is our policy on international shipments to over-pack all items to minimize the possibility of damage to the contents.

We take digital pictures during the packing and once the package is sealed. These pictures are included with the shipping/ customs papers and are also emailed to the customer when the shipment is given to the shipping company. This ensures that the customer knows the exact condition of the shipment when it has left our warehouse.

Customs Classification Code # for export of electrical parts that we sell is:  
8538909999 – "Electrical Apparatus – Parts of".
